

"It all began with an improbable wager: ask 35 scholars to each write something intelligible about every single paragraph in one of the texts included in Jacques Lacan's magnum opus, *Écrits*, so as to generate a commentary on the entire 800-page volume. And yet, after years of preparation, the wager has paid off: we have here useful and at times brilliant examples of textual explication! Cryptic formulations are lucidly unpacked, and mysterious references are provided, giving the serious reader myriad keys to fascinating texts." —Bruce Fink

"These essays will be an invaluable resource not only for those approaching the *Écrits* for the first time but also for seasoned readers. Broad in scope yet following the detail of the text, they help guide us through Lacan's difficult prose, elucidating, contextualising and clarifying, and reminding us time and time again of the precision, power and originality of his rethinking of psychoanalysis." —Darian Leader

"Let's face it: Lacan's *Écrits*, one of the classical texts of modern thought are unreadable—they remain impenetrable if we just pick the thick volume up and start to read it. Vanheule, Hook and Neill provide what we were all waiting for: a detailed commentary which does not aim to replace reading *Écrits* but to render it possible. When, after getting stuck at a particularly dense page of *Écrits*, we turn to the corresponding pages in the commentary and then return to the page of *Écrits* which pushed us to madness, the same lines appear in all the clarity of their line of thought. It is thus a safe prediction that Vanheule, Hook and Neill's commentary will become a kind of permanent companion of the English translation of *Écrits*, indispensable for everyone who wants to find her or his way in its complex texture." —Slavoj Žižek

The originality and importance of Lacan's *Écrits* to psychoanalysis and intellectual history is matched only by the texts' notorious inaccessibility. The three volumes of *Reading Lacan's Écrits* offer a series of systematic paragraph-by-paragraph commentaries—by some of the world's most renowned Lacanian analysts and scholars—on the Complete Edition of the *Écrits*. This comprises the first extensive commentary on the Complete Edition of the *Écrits*. It functions as an indispensable companion to the original and an essential reference for clinicians and scholars. Not only does it contextualize, explain and interrogate Lacan's arguments, it provides multiple interpretative routes through this most labyrinthine of texts.

Stijn Vanheule is a clinical psychologist and Professor of Psychoanalysis and Clinical Psychology at Ghent University, Belgium.

Derek Hook is Associate Professor of Psychology at Duquesne University.

Calum Neill is Associate Professor of Psychoanalysis and Cultural Theory at Edinburgh Napier University.
